DECLASSIFIED AND RELEASED BY CENTRAL INTELLIGENCE AGENCY SOURCES METHODS EXEMPTION 3B2B NAZI WAR CRIMES DISCLOSURE ACTOATE 2007

OFFICIAL DISPATCH

TO: Chief of Base, Munich TROM: Chief, IOD INFO: COS, Germany SUBJECT GENERAL - DYDORIC/GEACTIVE/Operational SPECIFIC - Jamming of Mikhailov Committee Radio Broadcasts REFERENCE: EIMA-29432 ACTION REQUIRED: Please pass information in para. 2 below to GEACTIVE through 1. Reference enclosure, CAN-14, indicated that GEACTIVE vished to know if KURARK was aware of the reported jamming and if there was any knowledge available of the identity of the immore. 2. Please inform GEACTIVE that we were not sware of the jamming, but believe it was probably spill-own, jamming irrected at some station operating on a frequency in close proximity to 9727 kc. It is suggested that GEACTIVE; if it is still interseved, attempt to determine whether or not another shortwave broadcastry is, in fact, operating close to the desired program. If additional analysis of the interference is desired, a tage recording of about fifteen minutes duration should be made of a typical broadcast including the Jamming signal, and its call sign if any, and forwarded here for further avalantics. SUBJECT GENERAL - DFDORIC/GENETIVE/Operational SPECIFIC - Jamming of Mikhailov Committee Radio Broadcasts REFERENCE: ECMA-29432 ACTION REQUIRED: Please pass information in para. 2 below to GENETIVE through 1. Reference enclosure, CAM-44, indicated that GENETIVE wished to know if KUBARK was sware of the reported jamming and if there was any knowledge available of the identity of the jamming. 2. Please inform GENETIVE that we were not sware of the jamming, but believe it was probably spill-over jamming directed at some station operating on a frequency in close prominty to 9727 kc. It is suggested that GENETIVE, if it is still interested, attaunt to determine whether or not another shortwave broadcasters, in fact, operating close to the desired program. If additional analysis of the interference is desired, a tape recording of about iffeen minutes duration should be made of a typical broadcast including the Jamming signal, and its call sign if any, and forwarded here for further avalantics. SUBJECT GENERAL - DTDCRIC/CEACTIVE/Operational SPECIFIC - Jaming of Mikhailov Committee Radio Broadcasts REFERENCE: EUMA-29432 ACTION REQUIRED: Please pass information in para. 2 below to CEACTIVE through 1. Reference enclosure, CAN-h4, indicated that CEACTIVE wished to know if EUMARK was aware of the reported jaming and if there was any knowledge available of the identity of the jaming, but believe it was probably spill-over jaming directed at some station operating on a frequency in close provinty to 9727 kc. It is suggested that CEACTIVE, if it is still interested, attempt to determine whether or not another shortwave broadcaster is, in fact, operating close to the desired program. If additional analysis of the interference is desired, a tape recording of about fifteen minutes duration should be made of a typical broadcast including the Jaming alguel, and its call sign if any, and forwarded here for further avaluation. ACTION REQUIRED: Please pass information in para. 2 below to CKACTIVE through 1. Reference enclosure, CAN-h4, indicated that CKACTIVE vished to know if KUBARK was aware of the reported jamming and if there was any knowledge available of the identity of the jamming. 2. Please inform CKACTIVE that we were not ware of the jamming, but believe it was probably spill-ovek jamming directed at some station operating on a frequency in close proximity to 9727 kc. It is suggested that CKACTIVE, if it is still interested, attasps to determine whether or not another shortwave broadcaster is, in fact, operating close to the desired program. If additional analysis of the interference is desired, a tape recording of about fifteen minutes duration should be made of a typical broadcast including the jamming signal, and its call sign if any, and forwarded here for further avalantion. ACTION REQUIRED: Please pass information in para. 2 below to CMACTIVE through 1. Reference enclosure, CAM-44, indicated that CMACTIVE wished to know if KURARK was aware of the reported jamming and if there was any knowledge available of the identity of the jamming. 2. Please inform CMACTIVE that we were not sware of the jamming, but believe it was probably spill-over jamming directed at some station operating on a frequency in close prominity \$6 9727 kc. It is suggested that CMACTIVE, if it is still interested, attach to determine whether or not another shortwave broadquester is, in tack, operating close to the desired program. If additional analysis of the interference is desired, a tage recording of about fifteen minutes duration should be made of a typical broadcast including the jamming algorithm, and its call sign if any, and forwarded here for further walpstick.
